Conservation and Resource Studies, Lower Division B.S.

College Admission Requirements for Transfer Students
This major is offered by the College of Natural Resources.

PROGRAM

The Conservation and Resource Studies major is administered by the Department of Environmental Science, Policy, and Management (ESPM). The major is an interdisciplinary program designed for students interested in environmental issues and interactions among disciplines related to natural resources, population, energy, technology, societal institutions, and cultural values.

Because CRS students draw on the course offerings of the entire campus, they have the flexibility to incorporate any combination of courses in the social sciences, biological sciences, physical sciences, or humanities to address complex environmental problems. Sample topics include environmental justice and education, sustainable development of world populations, energy and environmental policy, conservation and culture, and ecological restoration and policy, to name a few. Students may also draw upon appropriate community resources in the development of individual programs of study.

Despite the flexibility and breadth, all CRS curricula share a demonstrable commitment to gaining a truly interdisciplinary education. It differs from other ESPM majors in its individualized program that prepares students for a wide range of careers with an environmental leaning.

PREPARATION FOR TRANSFER AT THE JUNIOR LEVEL

Transfer students must complete all articulated lower division major requirements by the end of the spring term preceding fall enrollment at Berkeley. Exceptions are highly unlikely. NOTE: The ESPM Environmental Science Core and the ESPM Social Science Core requirements may be taken at Berkeley if no course is articulated at student's home institution.

Please pay particular attention to how courses from your community college articulate to Berkeley. If courses for a particular subject are articulated as a group (for example, a 3-course series at your college may articulate to a 2-course series at Berkeley), you will need to take all of the courses noted in order for the articulation to work. If you have questions about articulation, please contact our Office of Instruction and Student Affairs, College of Natural Resources, http://nature.berkeley.edu or (510) 642-0542.

There are two options for fulfilling the lower division major requirements:

Option 1: With the exception of ESPM 90 and one course in biology with lab, IGETC Certification will satisfy ALL lower division requirements for the
Conservation and Resource Studies, Lower Division B.S. (continued)

Conservation and Resource Studies major. Applicants must complete one course in biology with lab prior to fall enrollment at Berkeley, (Biology 1B [recommended], 1A, or 11/11L). ESPM 90 will be completed at Berkeley. In addition to IGETC.

Option 2: Transfer students can fulfill articulated lower division CRS major requirements at their institution. Students are highly encouraged to supplement their coursework with courses in environmental sciences, ecology, biology and preparation courses to the student's individualized upper division course plan.

NOTE: The ESPM Environmental Science Core and the ESPM Social Science Core requirements may be taken at Berkeley if no course is articulated at student's community college.

AP Credit - We will accept the following AP credit:

- AP Biology, with a score of 4 or 5 = Bio 1B, or Bio 11
- AP Calculus AB, with a score of 3, 4, 5 = Math 1A or Math 16A
- AP Calculus BC, with a score of 3 or 4 = Math 1A or Math 16A
- AP Chemistry, with a score of 4 or 5 = Chemistry 1A + 1AL
- AP English Literature, with a score of 3 = Subject A requirement
- AP English Literature, with a score of 4 = First half of Reading & Composition (ENGLISH R1A)
- AP English Literature, with a score of 5 = both halves of Reading & Composition (ENGLISH R1A and R1B)
- AP English Language, with a score of 3 = Subject A requirement
- AP English Language, with a score of 4 or 5 = First half of Reading & Composition (ENGLISH R1A)
- AP Environmental Science, with a score of 4 or 5 = ESPM Environmental Science Core
- AP Statistics, with a Score of 3, 4, 5 = Statistics 2

Please note that substituting AP scores for science and math coursework is accepted, but not recommended. Students who use AP scores for these requirements may struggle in subsequent coursework.

Please refer to the College of Natural Resources Handbook for more information about substitutions for the English R1A and R1B requirements:
http://nature.berkeley.edu/handbook

ESPM SOCIAL SCIENCE CORE COURSE
Select one of the following:
Conservation and Resource Studies, Lower Division B.S. (continued)

ESPM C11 Americans and the Global Forest (4) NO COURSE ARTICULATED
   Same as: LNS C30U

ESPM C12 Introduction to Environmental Studies (4) NO COURSE ARTICULATED

ESPM 50AC Introduction to Culture and Natural Resource Management (4) NO COURSE ARTICULATED

ESPM 60 Environmental Policy, Administration, and Law (4) NO COURSE ARTICULATED

ESPM 90 - Introduction to Conservation and Resource Studies Major. (To be taken at Berkeley only).

ESPM 90 Introduction to Conservation and Resource Studies Major (2) Course must be taken at the university after transfer.

TWO UC-TRANSFERABLE COURSES PREPARATORY TO UPPER DIVISION AREA OF INTEREST (6-8 Units)

(Note: Area of interest, determined by the student, should be in an environmental or resource management-related area such as biology, ecology, environmental studies, geography, etc.)

Note: Additional courses in the biological, environmental, and physical sciences are recommended.

End of major
